[REDACTED]

I apologize for the delayed response. We started a new administration in the Treasurer's office on January 6th and our new Communications Director does not start until next week. I will be handling press inquiries for a few days. Thank you for your patience:

At its December 16, 2014 meeting, the State Investment Commission (SIC) approved a \$50 million investment in the ISQ Global Infrastructure Fund. An independent board chaired by the General Treasurer, the SIC oversees investments for the \$8 billion portfolio of the Employees Retirement System of Rhode Island, a pooled vehicle for the five state-administered pension plans. The ISQ commitment is consistent with the SIC's policy asset allocation, which includes a targeted 3% allocation to private infrastructure.

Andrew Roos
