The investment options offered under your plan are categorized by their investment styles in the grid above. A well-diversified plan offers a range of investments that span from aggressive to conservative. You should review this style grid in conjunction with your Investment Policy Statement which describes the type and number of investment options to be offered under the plan. This grid is not intended as investment advice. It is only intended to demonstrate where the funds in your plan fall within the different Morningstar® asset classes and investment styles.

Morningstar® categorizes an equity fund's portfolio as being growth oriented, value oriented, or a blend of the two. In general a fund with a growth-oriented strategy will have a concentration of stocks that the manager believes has the potential to grow earnings faster than the market. A value-oriented strategy will have companies that do not grow earnings faster than the market. A fund with a blend investment style will contain a mix of the two philosophies.

Funds are also categorized by the size or market capitalization of the companies that make up the fund. Market capitalization is basically the number of common shares outstanding of a company multiplied by its current stock price. Large cap stocks are defined as those that account for the top 70 percent of the capitalization of the Morningstar® stock universe. Mid-cap stocks represent the next 18 percent and small-cap stocks represent the balance.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks. Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest; however, shares of the Funds are not insured nor guaranteed. High yielding fixed-income securities generally are subject to greater market fluctuations and risk of loss of income and principal than are investments in lower yielding fixed-income securities.

High yielding fixed-income securities generally are subject to greater market fluctuations and risk of loss of income and principal than are investments in lower yielding fixed-income securities.

The principal risks of investing in technology funds are those generally attributed to stock investing. Stocks of smaller companies tend to be less liquid, more volatile and sensitive to expected changes in interest rates. Because the Fund's investments are concentrated in information technology industries, the value of its shares will be especially affected by factors peculiar to those industries and may fluctuate more widely than the value of shares of more diversified portfolios.

You should consider the investment objectives, risks, and charges and expenses of the investment options carefully before investing. The prospectus/prospectus summaries/information booklets containing this and other information can be obtained by contacting your local representative. This information should be read carefully before investing.

Insurance products, annuities and funding agreements are issued by Voya Retirement Insurance and Annuity Company ("VRIAC"), Windsor, CT. VRIAC is solely responsible for meeting its obligations. Plan administrative services are provided by VRIAC or Voya Institutional Plan Services LLC ("VIPS"). VIPS does not engage in the sale or solicitation of securities. All companies are members of the Voya™ family of companies. **Securities are distributed by Voya Financial Partners LLC (member SIPC) or third parties with which it has a selling agreement.** All products and services may not be available in all states.

Important Information Regarding Presentations and Proposals:

This presentation is merely a proposal and, as such, represents one possible combination of funds available under the Voya program. The Plan's investment fiduciaries are free to select from among any of the funds available under the Program and are under no obligation or requirement to select all or any of the proposed funds. The selection of alternative funds from those proposed may impact the pricing of our services, depending on the levels of fund revenues available to Voya from such alternatives. The proposal represents Voya's assessment of a variety of factors, including fund expenses, fund performance and Voya's own revenue targets. The presentation is not intended to constitute and should not be relied upon as investment advice. This presentation may be made in the context of a competitive RFP process and in that case may consider the competing proposals of other providers.
